Silverton Consulting releases new StorInt™ Dispatches reporting on EMC's Avamar and IBM DS3300 and N-series announcements

Broomfield, Colo. – Ray Lucchesi, President of Silverton Consulting (<http://www.silvertonconsulting.com>) announces the availability of a two new Storage Intelligence (StorInt™) Dispatches summarizing the latest product announcements from EMC and IBM. The first StorInt™ Dispatch on EMC's September 6th Avamar announcement and the 2nd Dispatch on IBM's September 4th DS3300 and September 10th N-series announcements are available for free download for a limited time only from SCI's website.

On September 6th EMC announced two new versions of their Avamar source de-duplication product line a rack mounted server option and a VMware virtual machine option. The rack-mounted server is available in a single rack-mountable server and an already packaged configuration that supports up to 16 data servers, 1-utility server, and a spare server providing a RAIN configuration. The VMware virtual machine product is a software only solution, which is specially configured and augmented to provide Avamar services to a virtual server environment.

On September 4th and 10th IBM announced a new low-end storage system the iSCSI attached DS3300 and two new N-series products the N3300 and N3600. Included in the N-series announcements were two new software packages the Protection manager for more automated policy driven use of N-series local replication and SnapManager for SAP environments which provides for a more SAP application consistent snap copies.

Silverton Consulting, Inc. is a Storage, Strategy & Systems consulting services company, based in Colorado, offering products and services to the data storage community.
